# Programs to promote quality care

We have a number of programs that help ensure you receive the right care at the right time in the right place. These programs are included in the general term utilization management. Here's a brief explanation of *utilization management* and related terms:

**Utilization management** — The process of evaluating medical services to determine whether they are medically needed and performed in the most appropriate setting, for example, in a hospital, doctor's office or at home.

**Case management** — A program of individual planning and care for seriously or chronically ill people. Under the program, BCN Advantage assigns a nurse to work with the patient and physician to ensure that all appropriate care is provided.

**Concurrent review** — An assessment of the medical necessity or appropriateness of services when they are being rendered, for example, evaluating continued care for hospitalized patients.

**Discharge planning** — A complete review of a member's health needs in order to arrange for necessary care following discharge from a hospital or other inpatient facility.

**Disease management** — Comprehensive support and education for chronic health conditions. It aims to prevent the recurrence of symptoms and the progression of the condition and helps the patient maintain a high quality of life.

**Prior authorization** — A process that allows physicians and other health care providers to determine before treating a patient if a proposed service will be covered. Services are evaluated against medical criteria that are available to all network providers.

**Retrospective review** — Review of the appropriateness of medical services after they have been performed.
