

Blue Cross Blue Shield of Michigan Healthy Kids Dental Newsletter

Transportation to your Healthy Kids Dental appointments is still available at no cost to you.

Please note that as of October 1, 2024, you'll need to contact your Medicaid health plan if you want to schedule a ride to your dental appointment.

How to properly brush your teeth

Going to the dentist two times a year is important to your oral health. How you take care of your teeth at home is important, too! Here are some tips on how to brush your teeth well:

- Choose a brush that is the right size with soft bristles.
- Use a pea-sized amount of toothpaste with fluoride.
- Brush with light pressure.
- Brush with the bristles diagonally at a 45-degree angle toward your teeth.
- Brush all sides of your teeth.
- Make sure to brush all your teeth. Your toothbrush can only clean one to two teeth at a time.
- Brush after breakfast and before bedtime.
- Brush for two minutes.
- Replace your toothbrush every three to four months.

Soft drinks can cause cavities

The American Dental Association says that soft drinks can raise your risk of getting cavities. Soft drinks are drinks that contain sugar, carbonation or acid. These could be soda, juice, or sports and energy drinks.

What you need to know:

- Studies show that soda is one of the top causes of cavities and obesity in teens.
- Each can of soda has 10 teaspoons of sugar.
- Drink water to stay hydrated. Try to drink 8-12 cups of water a day.
- Eat cheddar cheese after a meal to make saliva. Saliva is helpful for digestion and nutrition.

Dentists agree that a healthy mouth helps create a healthy body through good nutrition. Children should see a dentist two times a year and brush their teeth two times a day for two minutes.
